Augusto Henrique

AI Engineer in Training | Python · LLMs · Building RAG Systems & AI Agents

São Paulo, Brazil

Summary

I'm a Computer Science graduate transitioning into AI Engineering, with a focus on building production-grade systems using Large Language Models, RAG pipelines, and autonomous AI agents. My background in enterprise IT — including 4+ years supporting critical systems at Mercedes-Benz across teams in Brazil, Germany, the United States, and India — gave me something most AI Engineers don't have early on: real exposure to how complex systems behave under production pressure, how to communicate across technical and business stakeholders, and how to operate in high-demand global environments. I'm currently deepening my technical stack in LLM Engineering, Agentic AI, and cloud deployment on AWS, working toward building AI systems that go beyond demos and actually run in production. I'm open to remote AI Engineer roles and freelance projects with international companies. If you're working on something interesting in the LLM or agent space, I'd love to connect. augusto.henrique.jobs@gmail.com

Experience

Mercedes-Benz Caminhões e Ônibus

4 years 3 months

Junior Information Technology Analyst

May 2024 - July 2025 (1 year 3 months)

São Bernardo do Campo, São Paulo, Brazil

Description:

Progression into a junior analyst role with broader ownership over GRC and SAP integration deliverables, acting as a point of contact for stakeholders and providing knowledge transfer to new team members.

Key Responsibilities:

- Continuation of GRC, authorization management and integration duties with expanded scope and technical depth.
- Coordination with business and technical teams to support governance, compliance and system performance.
- Training and onboarding of new intern, contributing to team capability and operational continuity.

Information Technology Administrative Assistant

April 2022 - May 2024 (2 years 2 months)

São Bernardo do Campo, São Paulo, Brazil

Description:

Operational ownership of SAP GRC-related activities, ensuring compliance, access integrity and alignment between functional and technical teams

Key Responsibilities:

- Execution and oversight of access management, SoD risk analysis and remediation within SAP ECC.
- Leadership of the support queue for authorization-related issues, coordinating third-party teams and internal stakeholders (primarily Finance & Controlling).
- Handling of critical incidents and emergency transports, ensuring continuity and system integrity under tight deadlines.
- Contribution to the update of the corporate risk matrix and participation as Integration Manager in the rollout of new SAP interfaces.

Information Technology Intern

May 2021 - April 2022 (1 year)

São Bernardo do Campo, São Paulo, Brazil

Description:

Exposure to SAP ECC and enterprise IT operations within a global automotive environment, supporting cross-functional teams and participating in the governance of technical environments.

Key Responsibilities:

- Support in SAP ECC ecosystem (basic ABAP debugging, interface monitoring and initial access governance via GRC).
- Coordination of daily stand-up meetings, status tracking and follow-up with internal stakeholders.
- Collaboration with global IT teams in Germany, the United States and India to assist in issue resolution and environment updates.

Education

FEI

Bachelor's degree, Computer Science · (January 2020 - December 2023)
